

KEEP YOUR LTE MIGRATION ROLLING WITHOUT ANOTHER COSTLY TRUCK ROLL

Meet Digi Remote Manager – Your key to a successful LTE migration.

Your First 6 Months are FREE!*

Now you can monitor, manage and control your new Digi 4G LTE TransPort® routers from a single, secure platform. Keep your 2G/3G migration schedule on track by monitoring the status and location of all your remote digital assets, old and new, as they are being replaced.

Be sure to keep your data flowing with automated software updates that will modify and maintain configuration of field units, en masse, for complete asset tracking and compliance. All without another costly truck roll.

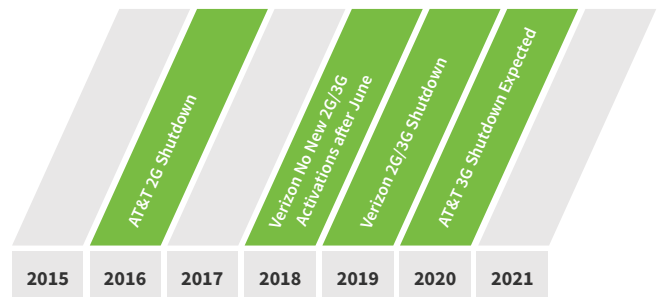

It starts with a management platform that lets you securely access devices after deployment. To not only update firmware, but to ensure security of your network by monitoring device status and health – as well as the connectivity and integrity of your entire network.

PLATFORM FEATURES

- Level 1 PCI-DSS validation
- Alerts for configurations changed in the field
- Automatically re-apply any changed settings
- Remotely manage all configurations, firmware and software updates
- Service reports on connection history, signal quality, latency, data usage and more

PLAN AHEAD TO STAY AHEAD!

The 2G/3G turndown is coming! AT&T has already shut down its 2G network, while Verizon has stated, “No new 3G ‘light ups’ after June 2018” – with a complete 3G shutdown by the end of 2019.

THE TIME TO START PLANNING IS NOW.

That's why Digi is offering six months of free usage when you purchase a 2-year Digi Remote Manager® contract to help you through the LTE migration process.

If you have a large number of devices that require replacement, who better to help you through it than Digi? We have the connectivity expertise, the software platform and the hardware that will make your LTE migration go smoother and easier. How is your plan coming?

THE RIGHT ROUTER FOR THE RIGHT JOB

It all starts with the right industrial router for the right industrial application. The Digi TransPort® router family has been recently enhanced to meet the rigorous demands of the upcoming LTE migration. Ruggedized, with advanced RF modules, Digi routers are your wireless backbone for industrial-strength communication, purpose-built with performance-focused options that specifically fit the application need.

No more guessing which router is the right router. Digi has a [selector tool](#) to make it even easier to decide. Check it out. If you have any questions you can always give us a call. We're here to help.

DIGI REMOTE MANAGER LTE MIGRATION PROMOTION

Sign up for a 2-year Digi Remote Manager contract, and receive your first six months FREE!

Enjoy all of the benefits of Digi Remote Manager without worrying about a payment for the first six months of your contract. This includes full functionality of the Digi Remote Manager platform as well as Technical Support if you have any questions.
